

Test Cases: Share Price Graph from FactSet Market Data

25 test case(s) • 5/22/2026

ID	Title	Category	Priority	Preconditions	Test Data	Steps	Expected Result	Linked AC
TC_MODULE_001	Valid security/ticker data integration	Functional-Positive	P1	Page is loaded for a valid security/ticker	Valid security/ticker symbol (e.g. AAPL)	1. Enter valid security/ticker symbol 2. Click 'Get Data' button 3. Verify data is retrieved from FactSet Market Data API	Data is successfully retrieved and displayed	AC1: Data Integration with FactSet
TC_MODULE_002	Invalid security/ticker data integration	Functional-Negative	P2	Page is loaded for an invalid security/ticker	Invalid security/ticker symbol (e.g. XXXX)	1. Enter invalid security/ticker symbol 2. Click 'Get Data' button 3. Verify error message is displayed	Error message is displayed indicating invalid security/ticker	AC1: Data Integration with FactSet
TC_MODULE_003	Data integration with missing credentials	Functional-Negative	P2	Page is loaded without necessary credentials	No credentials provided	1. Load page without credentials 2. Verify error message is displayed	Error message is displayed indicating missing credentials	AC1: Data Integration with FactSet
TC_MODULE_004	Graph rendering with valid data	Functional-Positive	P1	Valid data is retrieved from FactSet Market Data API	Valid data (e.g. OHLC and volume data)	1. Verify graph is rendered with valid data 2. Verify graph displays X-axis (time/date) and Y-axis (price)	Graph is rendered correctly with valid data	AC2: Graph Rendering
TC_MODULE_005	Graph rendering with invalid data	Functional-Negative	P2	Invalid data is retrieved from FactSet Market Data API	Invalid data (e.g. missing or malformed OHLC and volume data)	1. Verify graph is not rendered with invalid data 2. Verify error message is displayed	Error message is displayed indicating invalid data	AC2: Graph Rendering
TC_MODULE_006	Time range selection with valid range	Functional-Positive	P1	Graph is rendered with valid data	Valid time range (e.g. 1D, 5D, 1M)	1. Select valid time range 2. Verify graph is updated with new time range	Graph is updated correctly with new time range	AC3: Time Range Selection
TC_MODULE_007	Time range selection with invalid range	Functional-Negative	P2	Graph is rendered with valid data	Invalid time range (e.g. XXXX)	1. Select invalid time range 2. Verify error message is displayed	Error message is displayed indicating invalid time range	AC3: Time Range Selection
TC_MODULE_008	Graph interactivity with hover	Functional-Positive	P1	Graph is rendered with valid data	Valid hover action	1. Hover over graph 2. Verify tooltip is displayed with date, price, and volume	Tooltip is displayed correctly with date, price, and volume	AC4: Interactivity
TC_MODULE_009	Graph interactivity with zoom and pan	Functional-Positive	P1	Graph is rendered with valid data	Valid zoom and pan actions	1. Zoom and pan graph 2. Verify graph is updated correctly	Graph is updated correctly with zoom and pan actions	AC4: Interactivity
TC_MODULE_010	Data accuracy and freshness with valid data	Functional-Positive	P1	Valid data is retrieved from FactSet Market Data API	Valid data (e.g. OHLC and volume data)	1. Verify data is accurate and fresh 2. Verify 'Last updated' timestamp is displayed	Data is accurate and fresh, and 'Last updated' timestamp is displayed	AC5: Data Accuracy & Freshness
TC_MODULE_011	Data accuracy and freshness with invalid data	Functional-Negative	P2	Invalid data is retrieved from FactSet Market Data API	Invalid data (e.g. missing or malformed OHLC and volume data)	1. Verify data is not accurate and fresh 2. Verify error message is displayed	Error message is displayed indicating invalid data	AC5: Data Accuracy & Freshness
TC_MODULE_012	Error handling with API call failure	Functional-Negative	P2	API call fails	API call failure	1. Simulate API call failure 2. Verify error message is displayed	Error message is displayed indicating API call failure	AC6: Error Handling
TC_MODULE_013	Error handling with no data	Functional-Negative	P2	No data is retrieved from FactSet Market Data API	No data	1. Simulate no data 2. Verify error message is displayed	Error message is displayed indicating no data	AC6: Error Handling
TC_MODULE_014	Performance with initial graph load	Functional-Positive	P1	Page is loaded for the first time	Valid data (e.g. OHLC and volume data)	1. Load page for the first time 2. Verify graph is loaded within 3 seconds	Graph is loaded within 3 seconds	AC7: Performance
TC_MODULE_015	Performance with time range selection	Functional-Positive	P1	Graph is rendered with valid data	Valid time range (e.g. 1D, 5D, 1M)	1. Select valid time range 2. Verify graph is updated within 1.5 seconds	Graph is updated within 1.5 seconds	AC7: Performance
TC_MODULE_016	Responsive and accessible design on desktop	Functional-Positive	P1	Page is loaded on desktop	Valid data (e.g. OHLC and volume data)	1. Load page on desktop 2. Verify graph is rendered correctly	Graph is rendered correctly on desktop	AC8: Responsive & Accessible Design
TC_MODULE_017	Responsive and accessible design on mobile	Functional-Positive	P1	Page is loaded on mobile	Valid data (e.g. OHLC and volume data)	1. Load page on mobile 2. Verify graph is rendered correctly	Graph is rendered correctly on mobile	AC8: Responsive & Accessible Design
TC_MODULE_018	Security and compliance with valid credentials	Functional-Positive	P1	Valid credentials are provided	Valid credentials	1. Enter valid credentials 2. Verify graph is rendered correctly	Graph is rendered correctly with valid credentials	AC9: Security & Compliance (Banking)
TC_MODULE_019	Security and compliance with invalid credentials	Functional-Negative	P2	Invalid credentials are provided	Invalid credentials	1. Enter invalid credentials 2. Verify error message is displayed	Error message is displayed indicating invalid credentials	AC9: Security & Compliance (Banking)
TC_MODULE_020	Browser and device support on Chrome	Functional-Positive	P1	Page is loaded on Chrome	Valid data (e.g. OHLC and volume data)	1. Load page on Chrome 2. Verify graph is rendered correctly	Graph is rendered correctly on Chrome	AC10: Browser & Device Support
TC_MODULE_021	Browser and device support on Safari	Functional-Positive	P1	Page is loaded on Safari	Valid data (e.g. OHLC and volume data)	1. Load page on Safari 2. Verify graph is rendered correctly	Graph is rendered correctly on Safari	AC10: Browser & Device Support
TC_MODULE_022	Logging and monitoring with valid API calls	Functional-Positive	P1	Valid API calls are made	Valid API calls	1. Make valid API calls 2. Verify logs are generated correctly	Logs are generated correctly with valid API calls	AC11: Logging & Monitoring
TC_MODULE_023	Logging and monitoring with invalid API calls	Functional-Negative	P2	Invalid API calls are made	Invalid API calls	1. Make invalid API calls 2. Verify error logs are generated correctly	Error logs are generated correctly with invalid API calls	AC11: Logging & Monitoring
TC_MODULE_024	Unit testing with valid test cases	Functional-Positive	P1	Valid test cases are written	Valid test cases	1. Write valid test cases 2. Verify tests pass correctly	Tests pass correctly with valid test cases	AC12: Testing

ID	Title	Category	Priority	Preconditions	Test Data	Steps	Expected Result	Linked AC
TC_MODULE_02 5	Unit testing with invalid test cases	Functional-Negative	P2	Invalid test cases are written	Invalid test cases	1. Write invalid test cases 2. Verify tests fail correctly	Tests fail correctly with invalid test cases	AC12: Testing
